

Pneumatic Grommet Machine Model 3PGW

NEW

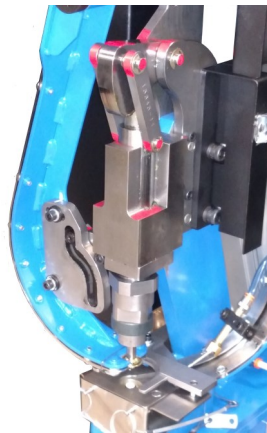

Edward Segal Inc. is pleased to introduce our **Model 3PGW**. The 3PGW is the most compact, fully automatic grommet machine in our product line. This machine is based on the proven 3P platform that has been manufactured since 2005.

The 3PGW relies on pneumatics and a powerful lever mechanism to produce sufficient force to set grommets in a wide range of fabrics, including certain webbing materials. And, to offer maximum flexibility, it is available with several configurations, including an optional Mobile Pedestal stand for portability.

The Edward Segal Inc. 3PGW brings fully automatic capabilities in a smaller machine and lower price! It is simple to operate and maintain, and is fully manufactured and supported in the USA!

(Shown on Pedestal Base with Barrier Guarding Removed)
