

# Model 83GW-U

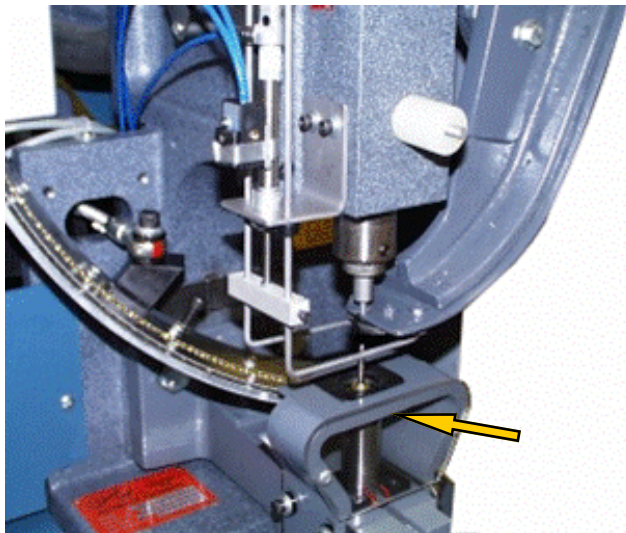

The Edward Segal, Inc. Model **83GW-U** automatically feeds and sets grommets and washers in a single revolution of the machine. This machine is unique as it is specifically designed for applications with pre-punched holes. The operator simply loads the material over the lower tool and actuates the machine.

## Features

- Automatic grommet & washer feed
- For grommets up to No. 4 Rolled Rim
- Single revolution cycle
- Appropriate for all fabrics
- Includes standard Ring Guard safety device

Prior to the cycle, the lower setting tool is in the up position with the washer in place ready to be attached. After the grommet and washer are attached, the machine returns to the up position ready for the next setting.

Lower Setting Tool in up Position
